

LUNCH & LEARN PROGRAM

Astro Pak provides on-site training and education through our Lunch & Learn programs. These informative sessions enable your staff to optimize their time while we provide lunch with a technical presentation at your facility. Let our knowledgeable scientists and engineers answer your specific application questions. Contact your Astro Pak Technical Sales Manager to schedule a Lunch & Learn at your company today!

TOPICS INCLUDE:

- ▶ Definitions of Passivation and Rouge, the available technologies and their effectiveness
- ▶ The effect of surface fabrication techniques on the passive oxide layer
- ▶ Corrosion identification, the conditions under which corrosion usually occurs and methods for remediation and avoidance
- ▶ Measurement of rouge in critical utilities with methods for tracking and trending
- ▶ Biofilm eradication strategies
- ▶ Precision cleaning processes and cleanliness verification levels
- ▶ How Mechanical Polishing and Electropolishing help to enhance the cleanability and appearance of stainless steel
